
DAIHEN (OTC) · Selection Guide

MMA welders and multi-process machines

Field-adapted machines for structural work and repair

About this series

Manual arc welding remains irreplaceable for site installation, repair and structural work. DAIHEN (OTC) offers a microcomputer-controlled multi-function DC machine and a portable TIG / MMA dual-purpose model for outdoor, piping and structural conditions.

Technical characteristics

- Microcomputer-controlled multi-function DC welder (MRA630) with switchable welding modes
- Portable TIG / MMA dual-purpose model covering both installation and repair
- DC output tolerates mains fluctuation well, suited to site and temporary power
- Straightforward control panel so operators can set up quickly

Typical applications

Site installation and repair · Pipe and fittings · Steel structure touch-up · Equipment maintenance

Representative models (2)

MRA630	Microcomputer-controlled multi-function DC welding machine
MINI 200P	Portable compact inverter DC pulse TIG / MMA dual-purpose welding machine
