

DAIHEN (OTC) · Catalogue

Torches, wire feeders and consumables

The parts that keep output stable

About this series

Weld quality drift usually starts with consumables. We supply torches, wire feeders, contact tips, nozzles, liners and wear parts matched to DAIHEN (OTC) machines, helping workshops keep wire feeding and arc conditions stable.

Technical characteristics

- Air-cooled and water-cooled torches matched to DAIHEN (OTC) machines
- Contact tips, nozzles, liners and other wear parts
- Consumable specification recommended to your welding current and duty
- Scheduled replacement of key wear parts alongside maintenance service

Typical applications

Workshop consumable supply · Machine maintenance · Torch replacement and upgrade

Representative models (4)

Welding torches	Air-cooled and water-cooled torches matched to DAIHEN (OTC) machines
Wire feeders	Matched wire feeding units and liners
Contact tips and nozzles	Wear parts selected to welding current and duty
Wear part kits	Grouped key wear parts for scheduled replacement

This document is a selection reference. Models, configurations and detailed specifications follow the technical documentation shipped with the equipment.
